## Introduction to HASPI and Expanding Your Pathway

Jewyl Clarke, SDCOE

The Health and Science Pipeline Initiative (HASPI) is a collaborative network of K-16 educators, industry representatives, and community organizations that are actively engaged in the common effort to improve students' ultimate success in healthcare professions. HASPI preparation is intended for students of all academic levels and backgrounds.

The HASPI lab curriculum modules complement your adopted textbooks and curriculum to provide contextualized learning opportunities for all pathway students in their core academic classes.
